</table>
| Hypochlorite based solutions (e.g. Hypochlorous acid, Sodium hypochlorite) | Dakin’s Solution (quarter strength), Dermacyn® | • Dakin’s Solution should not be used in concentrations greater than 0.125% (quarter strength).  
  • Consider using the fewest irrigation cycles and minimizing hold times to the lowest level that is clinically relevant. |
| Silver nitrate (0.5%)                      | Various                                   | Silver nitrate is light sensitive. Protect V.A.C. VeraLink™ Instillation Tubing from light during use of silver nitrate. |
| Sulfur-based solutions (sulfonamides)      | Mafenide acetate, Sulfamylon®             | Refer to manufacturer’s labeling for solution-specific considerations. No device-related considerations for use with V.A.C. VeraFlo™ Therapy. |

*Based on KCI in-house testing of disposables mechanical properties, biocompatibility, and solution interaction. Listing of specific solutions is not an endorsement of or indication of a solution’s clinical efficacy. If wound healing goals are not being achieved, consider an alternate instillation frequency, solution concentration, or solution type deemed appropriate by a physician.
NOTE: Specific indications, contraindications, warnings, precautions and safety information exist for KCI products and therapies. Please consult a physician and product instructions for use prior to application.

Consult manufacturer’s labeling for specific details. V.A.C.Ultra™ Therapy System is indicated for use only with topical wound solutions.
